

MooD Platform 16.057 Hotfix 1

Announcing a release of important quality, security and stability fixes.
17th December 2019

Thanks to excellent feedback from our internal teams and customers, we've put together a number of important quality, security and stability fixes to improve your MooD platform experience.

These fixes have been rolled into a hotfix for MooD 16.057, available now from the MooD Support Portal downloads page (<https://supportportal.moodinternational.com/hc/en-us/categories/115000806749-Downloads>)

This build, 16.057.01, will now be the default current build of 16.057. If you need a download of 16.057, or you would like to know more about any of these fixes, please contact support (moodsupport@caci.co.uk).

The following issues have been addressed, with the most critical issues towards the top of the list:

Issue #	Issue Title
11863	Action Panels: Adding an Inline form to a model is slow
11859	Aggregations: Business Architect crashes when executing with ‘% of grand total’ and no selected levels
11877	Excel Import: Business Architect shows an exception and then crashes when an excel import is cancelled
11851	Manage Themes: Three dialogs saying "An unexpected error occurred copying themes" appear when copying an unsaved relationship
11879	Queries: Incorrect "no entry sign" presented for queries when it starts from a sub-queries and has a condition that uses a parameter
11874	Viewing the Visio Import screen or starting Active Enterprise on Windows Server 2008R2 or Windows 7 fails
11659	Active Enterprise: Editing relationships in Info Panels is no longer possible
11844	Active Enterprise: If you only press "ok" whilst editing a relationship cell of a matrix on the web, you can no longer click inside cells.
11871	Aggregations: Page request time is no longer available as an option within the fact editor
11886	Business Architect: A user cannot copy a symbol which is not inside the main model canvas area
11867	Business Architect: Cannot apply Model Masters for processes via the Apply Model Master tool
11861	Business Architect: Network, Radial, Formatted Text Editor sometimes do not appear
11873	Button Actions: Upgrading a repository to M16.057 incorrectly ticks the new 'popup location' option
11890	SmartColumns: Error when starting sub-query contains a recursive query
11889	Web Security: A potential XSS ViewStateGenerator vulnerability exists
11868	Web Security: POST response has incorrect Cache-Control header
11806	Business Architect: Advanced shadow styles do not match their icons, causing confusion
11887	Excel Import: Typing C:\ in the file search field when selecting the Excel document, and clicking the 'OK' button, shows an Activation Exception
11516	Fixed Header Column Name Disappears
11809	Format Style: Shadow styles icons do not match the applied styles
11884	Plain Text Commentary Editors: When no element is selected, they incorrectly display a warning about missing data
11881	Active Enterprise: In HTML the mood-node-name attribute for panels isn't deterministic for matrices when placed on model masters, making them harder to find with XHTML panel extensions
11770	Active Enterprise: When editing matrices 'null' can appear in the drop down in rare circumstances
11885	Documents Synchronizer: Formatted text fields inside Matrices containing character do not produce a space between words, and they should
11741	Excel Import Synchronizer: gridlines being removed when selected
